What we're about

We are a group of enthusiasts that aim to promote and support Free and Open Source Technology in Singapore. First it was the Linux User Group of Singapore (commonly known as LUGS), then Singapore Linux Meetup Group and now Free and Open Source Singapore.

We welcome all like-minded people to join us and freely share knowledge and experience. Our aim is to hold a monthly meetup (last Thursday of month) with interesting and relevant speakers and topics. Do subscribe to our Youtube channels as we will try to put up recording of past events there:

https://www.youtube.com/channel/UCQ32IDYWIXV_iS5QNYzhMSw

Feel free to approach us if you have any ideas or wish to speak.
