GRADUATE STUDENT AT UOP  
SWAT, PAKISTAN

**SAMIM AHMAD**  
UNDERGRADE STUDENT AT UOP  
NANGARHAR, AFGHANISTAN

## WHAT WE DO

### BLOGS TO KEEP SCIENTISTS UP TO DATE

Technically relevant topics that enable bio-engineers to stay ahead and to be able to compete globally with the rest of the world.

### BLOGS AIMED AT LOCAL PUBLIC

Creating blogs for non-experts for the purpose of Bio arts, bio economy, and bio entrepreneurship, scientific sitcoms that may help them grow in the field.

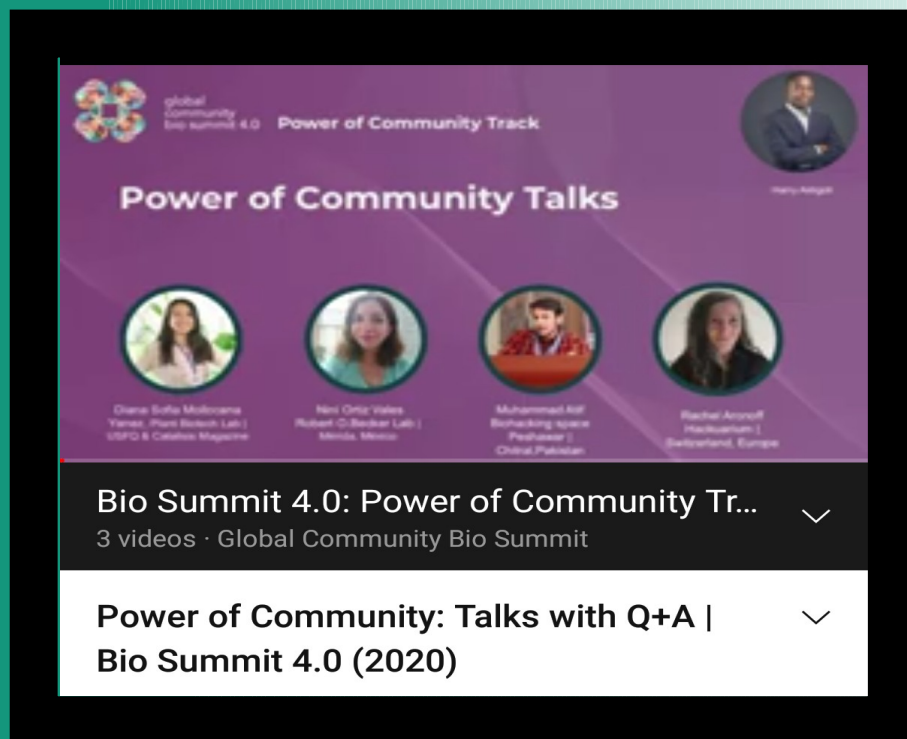

### STARTER LABS TRAINING

DIY equipment making training, catered to the intellectual and physical resources, available locally. Incubators, stirrers, Gel boxes and DIY centrifuges, Bio printer etc.

### SYNTHETIC BIO

Synthetic biology, also known as biotechnology 2.0, is the product of a paradigm shift in our modern approach towards Biology. Life sciences suffered the lack of standardization, abstraction and speculative mathematical models.
